

Rock Solid ERP, Inc. Joins UKG Connect Technology Partner Program
Collaborative partner ecosystem delivers solution extensions and integrations that further enhance the employee experience

Austin, TX, April 18, 2022 – Rock Solid ERP, Inc. (RSE) announced today that they have joined the UKG Connect Technology Partner Program, which is a collaborative ecosystem of solution providers working with UKG (Ultimate Kronos Group) to deliver a simplified and more connected technology experience. UKG is a leading global provider of human capital management (HCM), payroll, HR service delivery, and workforce management solutions.

With this collaboration, organizations that utilize UKG Ready and finance solutions such as Microsoft Dynamics 365 can benefit from RSE's business-rule driven, managed integration platform-as-a-service (MiPaaS) offering, named OneConnect. OneConnect leverages the Microsoft Azure cloud platform to provide an out-of-the-box, real-time integration between UKG Ready and Microsoft Dynamics 365, creating a complete end-to-end solution HCM and finance solution.

With OneConnect, RSE also provides managed system and error monitoring, fixes, and upgrade support for any integration point. Any data integrated with OneConnect can also be loaded directly into the Azure Data Lake to provide a centralized platform for enterprise reporting and business intelligence (BI) capabilities.

"OneConnect provides UKG Ready customers with a low-cost data integration tool that provides for the transfer and update of data between UKG, Microsoft Dynamics and other ERP systems, and enterprise reporting tools, including those utilizing Power BI in the Azure Data Lake," said Rick Brown, CEO for RSE. "OneConnect removes the personnel, software, and other costs and risks typically inherent to any enterprise implementation. OneConnect installs, monitors, and maintains interfaces at a fraction of the typical interface costs."

UKG Ready is a flexible and seamless full-suite HCM solution that helps smaller organizations simplify HR, talent, payroll, and timekeeping while also delivering personalized employee experiences.

"At UKG, we build lifelong partnerships with our customers so they can create connected and meaningful experiences for their employees," said Mike May, senior director of UKG Connect Technology Partner Program. "By cultivating a highly engaged ecosystem of technology partners that simplify the technology experience, we're able to empower our customers with better data visibility, more operational efficiencies, and most importantly, a great employee experience."

RSE is committed to helping customers reduce staff workload and lower the total cost of ownership of their enterprise solutions through our managed integration platform and ERP services. At RSE, we build long-lasting relationships with our customers through outstanding support services and solving business challenges associated with ERP solutions and traditional integration platforms.

About Rock Solid ERP, Inc.

RSE is a technology firm specializing in enterprise resource planning (ERP) system implementations, integrations, and long-term product help desk and support.
